DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, 15-24, 26-35, and 37, drawn to a pseudo-random number sequence output unit or method, classified in class 375, subclass 141.
 - II. Claims 13-14, 25, and 36-37, drawn to a filter unit or method, classified in class 375, subclass 350.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I and II are unrelated because Group I is directly related to a pseudo-random number sequence output unit or method comprising an input acceptance section that accepts input of real number sequence initial values, a calculation section that uses a real impulse constant, a non-zero real constant, the sequence initial values, and positive integers to calculate a pseudo-random number sequence, and an output section that outputs the pseudo-random number sequence; however, Group II is directly related to a filter unit or method comprising an input terminal that accepts an input signal of chip length D, a delay section that outputs a plurality of signals produced by delaying the input signal, an amplifying section that amplifies the delayed output signal and outputs the amplified signals, an adder section

that sums the output amplified signals and outputs the resulting sum signal, and an output terminal that outputs the output sum signal.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
